XUM ENTERPRISE LTD

Trading as Dr Memory
The experts in Upcycled Memory

What do we offer?

We are highly customer driven. Our goal is to provide the highest standards of care, before, during and after any purchase.

Next day delivery to UK and Europe

We post all UK items by **next day delivery** service where possible. We also attempt to ship everything on the same day of purchase.

Lifetime warranty

We provide **lifetime warranty** on all memories and a long warranty time on other parts; as a sign of trust on the quality of our items.

1st class customer support

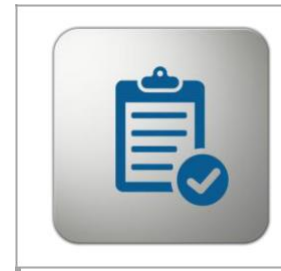

XUM has more than 145000 positive feedback across different channels: eBay, Amazon, Google and Facebook. In all channels close to 100% positive rating. XUM is the **UK's Number one** memory seller on eBay.

No quibble 60-day return policy

We have a 60-day no quibble returns policy. **Free prepaid** return labels for UK customers. XUM has extensive **test procedures** which contributes to close to zero return rate.

Credit account

We offer 30-day credit status to all schools, universities, councils, NHS trusts, police authorities, and all government departments and established SME's.

Upcycling

Why it is so important?

- Global e-waste is weighed at **65.4 million tons** in 2017.
- UK is ranked **sixth** in the world as a percentage of the total e-waste created annually (estimated to be about **1.4 million metric tons**).
- UK is, alarmingly, the worst offender in the EU, ranked at **22nd** position in terms of amount of e-waste produced per capita
- The total amount of household appliances collected during the second quarter of 2018 in the UK as a waste electrical and electronic equipment has **risen Q-o-Q by 8%** to 130,776 metric tons.
- 2017-2022 will witness 10 million tons of electronic products being bought into the UK, which will be equivalent to **20 tons of gold, 400 tons of silver, and 7 tons of platinum** group metals with an aggregate value of £1.5 billion.
- In five years' time, the level of e-waste is set to rise by **33% YoY** across the globe.
- An average household spends around £800 in the UK on new electrical and electronic goods resulting in about 1.4 million tons of goods. Regardless of the goods working or not, **40% of these end up in landfill** and less than 10% is reused.
- 25% of waste electrical and electronic equipment (WEEE) discarded annually by consumers could possibly be **reused**.

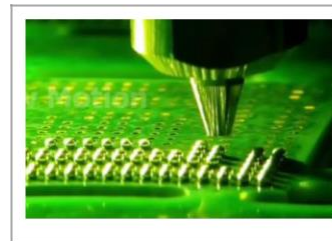

Steps

Source of the boards/ Type of the chipsets

Most boards from game consoles, TVs, PCs, laptops and Servers or any device with "GB" in its spec can be utilized.

De-soldering, Re-balling and testing

A background in the electronic industry is mandatory in order to understand how most electrical boards work.

Build new products

Endless opportunities.

What do our customers say?

We know you need peace of mind when purchasing online. Trying to find the right seller can be tedious and time consuming. Hopefully our excellent reviews make it easier for you to decide.

“Excellent products - Quick delivery, Very good technical support and quick response. Perfect place to buy.” — HBN VLOGS

eBay

99.9% out of 142000 reviews.

Google My Business

4.7 out of 5.

Amazon

99% for the last 365 days and over 1000 reviews across UK, Germany and France.

Facebook

4.9 out of 5.

Yell

Excellent score- 5 out of 5.

Products

Wholesale laptop and desktop memory ram

XUM are able to supply wholesale memory RAM at trade prices for laptop and desktop Ram memory. We are also able to fulfil bulk orders.

DDR4 DDR3 and DDR2 memory Ram

DDR4 – Available in 4GB, 8GB, 16GB and 32GB modules. Speeds ranging from 2133MHz – 3200MHz (PC4-17000 – PC4-25600).

DDR3 – Available in 1GB, 2GB, 4GB, 8GB & 16GB modules. Speeds ranging from 1066MHz – 1866MHz (PC3-8500 – PC3-14900) normal and low voltage.

DDR2 – Available in 1GB, 2GB & 4GB modules. Speeds ranging from 533MHz – 800MHz (PC2-4200 – PC2-6400).

Wholesale server memory ram

XUM specialise in wholesale memory server Ram upgrades and can offer 100% matched solutions for trade customers for all servers such as Poweredge R710, Poweredge R310, Poweredge 2900, Poweredge 2950, Poweredge R720, Proliant BL480c Server Blade, Proliant BL460c G6, Proliant BL465c, Proliant DL370 G6, IBM Blade Servers and many more.

DDR4 DDR3 and DDR2 memory Ram

DDR4 – Available in 4GB, 8GB, 16GB 32GB and 64GB modules. Speeds ranging from 2133MHz – 3200MHz (PC4-17000 – PC4-25600).

DDR3 – Available in 1GB, 2GB, 4GB, 8GB , 16GB and 32GB modules. Speeds ranging from 1066MHz – 1866MHz (PC3-8500 – PC3-14900) normal and low voltage.

DDR2 – Available in 1GB, 2GB, 4GB and 8GB modules. Speeds ranging from 533MHz – 800MHz (PC2-4200 – PC2-6400).

Who are we?

XUM is primarily a manufacturing company. We gather reusable IC chipsets through the recycling centres and follow a unique upcycling process to make new products in electronic storage devices such as Memory Ram and Solid State Drives.

XUM care about our planet. Each fresh build of an IC-chip consumes 1.42kg of coal (41MJ) or 0.95kg of oil. By acquiring at least 800,000 recyclable chips:

- XUM prevents the release of more than 10 tons of CO2 **every month!**
- Monthly saving of more than **1,000 tons of coal or 5K oil barrels.**
- More than **50K upcycled** products per month.
- Very **competitive pricing** due to use of upcycled components that would otherwise go to waste.
